GENERAL DESCRIPTION OF THE SCHOOL

Shue Yan College is a government-registered non-profit-making institution founded by a number of local civic leaders and educators for the purpose of providing a complete secondary and post-secondary education with special emphasis on moral as well as academic training. This policy is adopted in the belief that only by inculcating sound moral values coupled with academic knowledge can we expect our students to develop their own potentialities to the fullest and, at the same time, strive to benefit the society in which they live.

We consider school discipline to be an important tool in teaching moral values for we believe that if a student is taught to respect his teachers and fellow-students, as well as to seek success through honest effort while still young, he will continue to live by these values when he reaches adulthood. As both family and school have a very great influence on a child's outlook and behaviour, we hope to augment the effect of this influence by endeavouring to work in close cooperation with our students' parents.

We consider the attainment of proficiency in both Chinese and English to be a basic part of every student's education. Since last year we have started a new English programme in which special emphasis is placed on the audio-visual aspects of the language in addition to the more traditionally taught skills of reading and writing.

At present, our school has established a relationship with Northeast Louisiana State University, San Francisco University, and the University of Wisconsin, etc. These relations will provide our students with even more opportunities to further their studies after graduating from Shue Yan.
